Corona - Information concerning the beginning of school after the pentecost holidays

Dear parents, please take notice of this information concerning the classes at school after the Pentecote holidays

Children and adolescents with a previous illness

Children and adolescents who have an illness like for example diabetes, cancer or a heart desease, don't have to come to school due to corona. This also applies if a member of the family such as parents, brothers, sisters or other persons who live in the same household have one of these diseases.

Please inform the school in writing if your child is not allowed to attend classes and also consult your doctor.

Children who cannot attend classes for health reasons, will be given homework by their teachers and will continue to learn at home.
